

Standard Engineering Ltd.

It's Summer! Time to refurbish!

What does "reconditioned machinery" actually mean?

We can't answer that question for everyone, but at Standard Engineering reconditioned machinery is prepared thus: -

The machine is completely stripped of all motors, parts and consumables

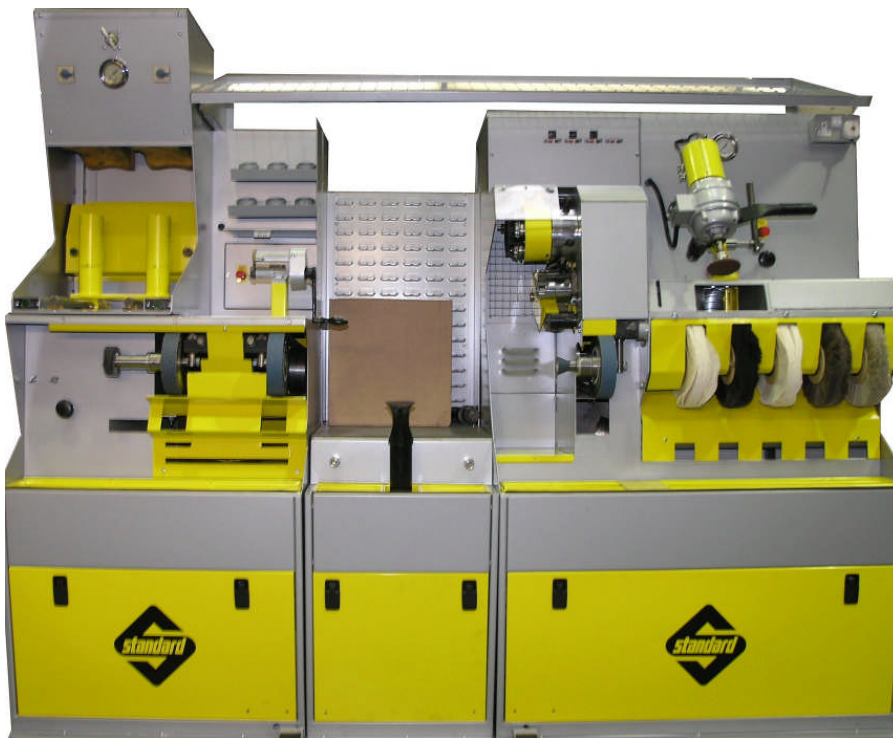

All the tinwork is shotblasted to remove the original paintwork

The clean tinwork is painted in your choice of colour(s) and stove dried for added durability

The machine is rebuilt exactly how we would build a new machine using new parts and consumables where necessary

The motors will be checked and reused if sound. If not, new motors will be substituted

The machinery is rigorously tested prior to delivery

Model 880 Power Unit

Whether you are looking for the latest brand new Model 710 Finisher, or a reconditioned Tiger Press, Standard offer the same level of professional care and attention to detail.

We offer quality British made machinery for home and worldwide markets.

We have the experience and know-how to deliver the shoe repair machinery you need at competitive prices.

For further information, or to request a quote either visit our website, or call us on 01536 517070 option 3.
